Synopsis

Use These Guidelines Of Super Healthy Food Consumption And Start Treating Your Body How It Deserves Today! Nature gifted us her most valuable resources and we should value them as they are, without trying to transform them. For many years, humans lived on the natural nutrients that nature provides us with, but unfortunately, only in the last century food experiments were conducted and implemented to produce crazy amounts of food. Today, it's increasingly harder to find an ingredient that has naturally grown under the sun. Instead, the food industry giants are continually looking for cheaper ways of producing more and more food for larger profits thus introducing many artificial ingredients into our food. What does this mean for us? The sad thing is that, as our schedules become tighter and tighter, most of us are opting for empty-calorie, ready-to-eat foods from these food giants that only require to be popped in the microwave for 3 minutes and voila! Dinner is ready! Should the ever-increasing cases of lifestyle diseases such as cancer, diabetes, heart diseases, and the like then come as a surprise to us? I will tell you with certainty, NO! If we all stop just for a few seconds and pay attention to what our bodies are saying and respect that, only then will we understand that our bodies need real food to function and heal. This is where the whole food diet comes in; healthy living is a lifestyle and starting with the whole food diet is the first step to success. When undertaking the whole food diet, you should emphasize on dark green leafy veggies, plant obtained foods and other natural foods that have undergone zero or minimal processing. We are going to look at the whole food diet approved foods, complete with over 100 healthy whole food recipes in this guide. With the popularity of this diet, what's your excuse for not giving it a shot? Is it the cost, being too busy to make any diet work or the fact that you have a raging sweet tooth? We've all been here so I totally get it. But, with a lot of determination and some planning and keeping things simple, the whole food diet is totally possible. We are going to look at some delicious recipes made using every day healthy ingredients so don't worry about cost or using too much time cooking. When it comes to all the functions within your body, it all starts with food. So, let's get started! I bought this book at a very low price, I believe it was under \$5. For that price, I cannot complain. I definitely benefited from this book. I learned from being on a whole food diet, from increases my fiber intake by eating more fruits and vegetables, to giving me a 30-day meal plan. This book was a must for people who are very indecisive and need something to guide and follow them to success. I will probably change some of the lunch ingredients but all in all a very good read. I can definitely recommend this book to those starting out on a whole food diet and also would like some recipes and a meal plan to guide them.

One with the best recipes in a book so far. I love how everything is explained step by step for readers like me can easily understand every preparations. This 30 day diet book is greatly helps me a lot not just to satisfy my tummy but also my body and health. This book greatly improved my way of losing weight without getting really worked up. I am so happy that everything paid off and what I am now is all thanks to this book.

Challenges are interesting as we all wait for the end result eagerly! When it comes to diet, I'm always interested and I follow and try different diet regimes to keep fit. This whole 30 challenge thing caught my attention instantly and I liked the meal plan but the chart is written in a very tiny font for normal eyes to read! Simon started this book in a very well descriptive way about whole 30 challenge; what it is and how it works, how to stay focused etc. The recipes are really good and I've read quite a few and prepared 2-3 as of now! There are no nutritional value given for the recipes but it's well written. I'm looking forward to it :)
