# Office VBA Macros You Can Use Today: Over 100 Amazing Ways To Automate Word, Excel, PowerPoint, Outlook, And Access

Synopsis

For any Microsoft Office user familiar with Word, Excel, PowerPoint, Access, or Outlook, this book provides tutorials on the tools and tricks that automate these programs for increased productivity. Each lesson includes instructions and a downloadable file on which to test the VBA macros and procedures provided. Tasks covered include how to run several mail merges at once, removing duplicates from data, and saving email attachments.

Book Information

File Size: 21654 KB

Print Length: 420 pages

Publisher: Holy Macro! Books (January 1, 2006)

Publication Date: January 1, 2006

Sold by: Digital Services LLC

Language: English

ASIN: B0087GZ8PQ

Text-to-Speech: Enabled

X-Ray: Not Enabled

Word Wise: Not Enabled

Lending: Not Enabled

Enhanced Typesetting: Not Enabled

Customer Reviews

Although I've developed macros for years in MS Word, MS Excel, MS Access, and PowerPoint, this book still gave me new information and ways to accomplish tasks. The book is well worth the time to wander through. The only suggestion I have is that unless things have changed, PowerPoint has to dynamically create and assign macros to the buttons via the Auto_Open subroutine. An Add-In is created and loaded. This wonderfulness might have been briefly explained. But maybe the assumption is that folks know this already. I'm speaking from the perspective of a person who is new to PowerPoint macros.

If you have read "Excel 2007 Power Programming" by John Walkenbach, you might agree that the best part of the book is the programming examples chapter.Well, "Office VBA Macros You Can Use Today" is about 400 pages of examples like that. The only draw back of the book is that is can be a little hard to read due to the comments and paragraph marks in the code.Overall, the book is good at giving practical coding examples to help you integrate Microsoft Office products.

General information for VBA code newbie users; explains all usage in MS Office applications and good coding examples to mess with for practice.

usefull macros that form a good impression of what you can do whit vba
