This book in my opinion is a MUST HAVE book if you are new to Windows 8. For me, I have found this book to be so helpful as it allowed me to be much more comfortable using Windows 8 and find my way around Windows 8 easily! Therefore, I will share with you the reasons why I am recommending this book to you: 1) There are 12 chapters in this book and each chapter has several very useful lessons in them. There is a total of 65 lessons in this book and each lesson has a picture or pictures that are large enough to visually see what to do in the lesson. Also, each lesson is very easy to follow and understand as every lesson is explained superbly! *What I love about the lessons is that it is like having a caring teacher sitting next to me showing me how to complete different tasks in Windows 8. 2) This book covers many things especially in the first part of the book where the authors show you how this book will benefit you in Windows 8. This is a complete textbook and reference book. 3) Each CHAPTER with lessons is in the exact order of the step by steps you will need to get you up and running and learning Windows 8. For example, Chapter ONE covers starting your computer for the first time in Windows 8 and how to personalize your computer, how to set up the computer, sign up for Microsoft Account, Lock Screen, Start Screen, Login screen. All of this is shown with actual pictures of what your screen will look like complete with step by step info on how to use this task. ***My personal tips for you: If you have a NON TOUCH laptop or desktop, you will love this!
