Ada 2005 Rationale: The Language, The Standard Libraries (Lecture Notes In Computer Science)

Synopsis

Ada 2005 is the latest version of the International Standard for the programming language Ada. Formally, it is an Amendment of ISO/IEC 8652:1995 (E) rather than a completely new standard. The primary goals for the new version were to enhance its capabilities particularly in those areas where its reliability and predictability are of great value. Accordingly, a number of intriguing and attractive ideas have been included and implemented in a coherent manner as appropriate to the level of perfection necessary for the diligent maintenance of a language standard. The Ada 2005 Rationale describes not only the changes from Ada 95 but also the reason for the changes. It starts with an introduction providing a general overview and this is followed by seven chapters focusing on OOP; access types; structure and visibility; tasking and real time; exceptions, generics, etc.; the predefined library; and containers. The book concludes with an epilogue largely concerned with compatibility issues.

Book Information

Series: Lecture Notes in Computer Science (Book 5020)

Paperback: 267 pages

Publisher: Springer; 2008 edition (June 27, 2008)

Language: English

ISBN-10: 3540797009

ISBN-13: 978-3540797005

Product Dimensions: 6.6 x 0.6 x 9.4 inches

Shipping Weight: 1.1 pounds (View shipping rates and policies)
