Customer Reviews

We are not cat people but have a son who is, so we picked this book in preparation. I was disappointed with the lack of litter box training, actually there was not really any elimination training

tips. The price was rather high for the lack of information.

as a first time cat owner I was looking for a book to help me understand her behaviour but didn't have time for a novel. this was perfect for my time and helpful for giving me knowledge.

I liked this book. there were some good ideas it tolled of picking up cats several times to help them to get use to being used to being touched. h

Anyone who advices a cat owner to allow their cat to go outside doesn't understand the dangers your cat will encounter and should research the advice they give before writing a book. Statically indoor cats live longer since they are not exposed to things such as getting run over by a car, cat fights, deadly diseases, animal attacks and people that don't like cats. Most vets, animal shelters and breeders advise having an indoor only cat and many shelters will not adopt out a kitten or cat without an agreement to keep your cat inside.No I would not recommend this book to anyone.
