# Design And Analysis Of Composite Structures (AIAA Education)

## Synopsis

Design and Analysis of Composite Structures enables graduate students and engineers to generate meaningful and robust designs of complex composite structures. Combining analysis and design methods for structural components, the book begins with simple topics such as skins and stiffeners and progresses through to entire components of fuselages and wings. Starting with basic mathematical derivations followed by simplifications used in real-world design, Design and Analysis of Composite Structures presents the level of accuracy and range of applicability of each method. Examples taken from actual applications are worked out in detail to show how the concepts are applied, solving the same design problem with different methods based on different drivers (e.g. cost or weight) to show how the final configuration changes as the requirements and approach change. \* Provides a toolkit of analysis and design methods to most situations encountered in practice, as well as analytical frameworks and the means to solving them for tackling less frequent problems. \* Presents solutions applicable to optimization schemes without having to run finite element models at each iteration, speeding up the design process and allowing examination of several more alternatives than traditional approaches. \* Includes guidelines showing how decisions based on manufacturing considerations affect weight and how weight optimization may adversely affect the cost.

## Book Information

Series: AIAA Education

Hardcover: 300 pages

Publisher: Amer Inst of Aeronautics & (October 15, 2010)

Language: English

ISBN-10: 1600867804

ISBN-13: 978-1600867804

Product Dimensions: 6.4 x 0.9 x 9.7 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #2,130,786 in Books (See Top 100 in Books) #94 in Books > Engineering & Transportation > Engineering > Civil & Environmental > Structural Dynamics #355 in Books > Engineering & Transportation > Engineering > Aerospace > Aircraft Design & Construction #786 in Books > Arts & Photography > Decorative Arts & Design > Industrial & Product Design
